Alcance del sistema de gestión: "Importación - exportación, comercialización y distribución de recambios para vehículos industriales y comerciales".
La certificación es la manera más creíble para demostrar la excelencia e impulsar la mejora continua.

Import, export and trading of spare parts and accessories for Industrial and Commercial vehicles.

Certification is the most credible to demonstrate excellence and drive continuous improvement basis.

Todas nuestras fábricas disponen de la más avanzada tecnología y un personal altamente cualificado en el desempeño de sus especialidades. Todo ello con el único objetivo de poder ofrecerle el mejor recambio, con el tiempo de vida más largo posible.

Esto es un hecho. ¿Cómo podemos decir esto con tanta seguridad? Porque contamos con la mejor materia prima y el mejor proceso de fabricación.

All our factories have the latest and most advanced technology and highly qualified technicians in the performance of their specialities. All of this is done only aiming to be able to offer the best spare part with the longest lifespan possible.

It is a fact. How can we be so certain of it? It is due to having the best raw material and the best process of manufacturing.

En AYAX sabemos que el abastecimiento, servicio y atención al cliente, son la última aún que no menos importante fase del proceso. La eficiencia y rapidez son vitales para el correcto funcionamiento del negocio de nuestros clientes.

El servicio y la atención personal y especializada, nos preocupa tanto como la calidad del propio producto.

In AYAX we know that the supply, service, and customer service are the last but not least parts of this procedure. Efficiency and speed are of primary importance for the appropriate functioning of our client's business.

Our service and personal, qualified customer attention concern us as much as the quality of the product itself.

Antes de ser ofrecidos a nuestros clientes, los productos son validados en bancos de pruebas estáticas y dinámicas, junto a pruebas de vida en vehículos reales. Así mismo, son certificados con los más exigentes estándares para el mercado Europeo.

Before we offer our products to our clients, we have them validated in static and dynamic test beds as well as life-tested in real vehicles. In the same way, they are certified to the most demanding standards for the European market.
